## NYSE Euronext Welcomes AbbVie to Its European and U.S. Markets

*Global biopharmaceutical company cross-lists and rings the Opening Bell<sup>SM</sup> in New York*

**New York, Paris, January 2, 2013** – Today, AbbVie (ticker symbol: ABBV), a global research-based biopharmaceutical company formed in 2013 following separation from Abbott (ticker symbol: ABT), marked its cross-listing on NYSE Euronext (NYX) markets in Europe and the United States by ringing the Opening Bell in New York. AbbVie used the streamlined, cost-effective Fast Path process to cross-list in Europe, making it the fifteenth company to take advantage of this procedure since it was made available by NYSE Euronext in 2008.

AbbVie’s Common Stock was admitted to listing and trading on the NYSE Euronext markets by direct listing of its approximately 1.58 billion existing shares making up its capital and representing a market capitalization of €40 billion/ \$54 billion.

Richard Gonzalez, CEO of AbbVie, said: *“Today AbbVie launches with an outstanding portfolio, a solid pipeline and enthusiastic people who will serve patients and deliver growth. With those assets and a relentless focus on innovation we intend to create significant value for our shareholders.”*

*“We welcome AbbVie to the community of NYSE Euronext listed companies and applaud its decision to cross-list on our European and U.S. markets which will reinforce its global identity”,* added Scott Cutler, EVP, Head of Global Listings at NYSE Euronext. *“This is the beginning of a lasting relationship that will give AbbVie the benefits of the highest levels of service, liquidity and transparency available through NYSE Euronext.”*

**Notes to Editors:**
**1 Background about cross-listing on NYSE Euronext European markets**

- NYSE Euronext is the first and only exchange group to offer a truly global cross-market listing, trading and visibility platform, providing cost-effective, convenient access to investors and business partners in the US and in Europe.
- NYSE Euronext is the first exchange group to offer companies the ability to trade and raise capital in € and \$ and reach investors and constituents directly across continents and multiple time zones, regions and countries.
- Valuable for any company looking to enhance its global profile, support an international business or expand its non-US investor base, a Fast Path listing provides an easy, cost-effective way to gain a European trading presence. Euronext regulators accept documentation, previously filed with the SEC, to satisfy the EU Prospectus Directive. With Fast Path, a company avoids the need to draft and translate a separate prospectus in order to be admitted to trading. Documents filed with the SEC serve as the primary component to obtain approval from the competent Euronext regulator. The SEC documentation is combined with a summary “wrapper”, addressing any additional European and local requirements, forming the company’s European prospectus.
